SAFETY AND TECHNOLOGY IN MOTORSPORT AND AT WORK

BEST FORMULA1 TEAMS CHOOSE SPARCO

When you think about the concept of **safety**, the connection to **Sparco** is almost automatic. For more than forty years Sparco has been the official safety supplier of **the most important world teams** in the most dangerous sport in the world: **MOTORSPORT**.

Sparco Teamwork is the collection of **shoes and workwear** in which **safety, lightness and design** draw inspiration from the motorsport experience, translating into a work key with the same goal: to guarantee **maximum performance**.

WELCOME TO THE SPARCO WORLD.

TEAMWORK TECHNOLOGY

SPARCO TEAMWORK shoes are developed using the best technologies in terms of soles and midsoles, in order to optimize the exertion produced in walking by the forefoot where the greatest stresses for the user are concentrated, thus returning **70%** of the energy produced.

This benefit offers advantages in using SPARCO TEAMWORK footwear, such as:

- less fatigue at the end of the day, thus improving reflexes and attention to the dangers of slipping and tripping injuries;
- less exertion in walking;
- less strain on the back and spine;
- relaxation of the muscles.

FLEXGRIP+

Super light sole in dual density polyurethane with special design of the lugs which guarantee maximum grip in all flexion conditions.

CROSSGRIP

Ultralight sole with PHYLON midsole and CROSSGRIP rubber tread with lugs that guarantee a strong grip even on particularly uneven surfaces.

MULTIGRIP

Ultralight sole with shock absorbing effect provided by a thick ultralight EVA midsole and MULTIGRIP RUBBER tread.

R-FLEX

Ultralight sole in single-density polyurethane designed for intensive use where the foot bends frequently.

PRISMAFLEX

Ultralight sole with EVA midsole and genuine rubber tread with PRISMA texture that provides strong grip in all foot bending conditions.

DYNATECH

Lightweight dual density polyurethane sole with dynamic drain design to facilitate the outflow of liquids, always guaranteeing maximum grip.

STREETTECH

Ultralight dual-density polyurethane sole designed to facilitate dynamic use and move safely in all situations.

WAVE TECH

Ultralight sole with phylon midsole and rubber tread. Ideal for all uses, even for outdoors in leisure time.

SAFETY SHOES

LINE ORACLE RED BULL RACING LINE

THANKS TO THE AGREEMENT WITH THE FORMULA1 TEAM "ORACLE RED BULL RACING", SPARCO DEVELOPED A SAFETY SHOES LINE MADE OF PRECIOUS MATERIALS AND SPECIAL ORACLE RED BULL RACING LIVERIES. FOR THOSE SEEKING SAFETY AND PERFORMANCE, IN FULL MOTORSPORT SPIRIT.

Self-cleaning profiles for the outflow of liquids.

Sculpted lugs for greater slip resistance.

Self-cleaning profiles for the drainage of liquids.

SUPERLIGHT EVA MIDSOLE AND HRO RUBBER TREAD.

SOLE:
dual-density polyurethane with energy absorption on the heel.

SIZES:
36-47 (UK 3 1/2 -12)

Footwear designed for all those who are forced to work in environments characterised by a high presence of water. WR footwear is in fact made with materials and techniques that prevent the entry of water while guaranteeing excellent breathability and therefore perfect hygrothermal comfort.

WALK TEST
(according to EN ISO 20345:2011)
1,000 steps (about 20 min.) in a tank containing 3 cm of water, the wet internal surface must be $\leq 3 \text{ cm}^2$.

DRS MEMBRANE BY SPARCO TEAMWORK (DRY RESPIRATION SYSTEM):

The special **DRS** membrane by **SPARCO TEAMWORK** ensures maximum breathability and comfort while preventing water from penetrating into the upper, leaving the feet always dry and protected.

Made with a special material with microscopic porosity, it looks like an invisible sock that keeps the foot dry and thermally stable, both in hot and cold conditions, thus guaranteeing an ideal hygrothermal climate.

LINE CHALLENGE LINE

**SAFETY FOOTWEAR MADE OF NYLON AND SUEDE.
DURABLE AND SUITABLE FOR ANY CONDITION
(OUTDOOR AND INDOOR).**

CERTIFICATIONS AND CE STANDARDS

GUIDE TO EN ISO 20345:2011 STANDARDS

Footwear for professional use in accordance with EN ISO 20345:2011 are marked with an “S” (Safety) as Safety Footwear. The so-called “**basic**” shoe is marked with the letters “**SB**” (S = Safety - “B” = Basic). This footwear must have the following minimum requirements:

- height of the upper ■ toe cap (minimum length, minimum supporting base) ■ upper in fresh split leather, microfibre and similar ■ front lining ■ insole ■ sole in any type of material, can be smooth
- the upper, in the low footwear, can be opened in the heel area.

In “**SB**” footwear, the following requirements are never included unless specified in detail:

- antistatic ■ energy absorption of the heel ■ dynamic waterproofing of the upper ■ sole with lugs
- rear lining ■ water-repellent upper ■ anti-puncture plate or fabric.

The meaning of the stamping that you can find on the footwear is given below. They have been designed, equipped with toe caps designed to provide protection against impact when tested at an energy level of 200J”.

EN ISO 20345:2011

Protective footwear in accordance with EN ISO 20345:2011 is called “Protective footwear”.

It is basically identical to safety footwear. The only differences are the following:

- impact protection toe cap with energy of 100 J and compression of 10 KN
- it is marked with “P” (Protective) in place of the “S” (Safety).

NB: use in all workplaces where the protection of 100 J is sufficient.

THE MEANING OF THE EUROPEAN STANDARDS

EN ISO 20349:2010 Small splashes of molten metal such as those produced during welding operations and related processes.

EN ISO 20344:2011 Test methodology and general requirements.

EN ISO 20345:2011 Specifications of safety footwear with toe resistance at 200 J.

EN ISO 20346:2011 Specifications of protective footwear with toe resistance at 100 J.

EN ISO 20347:2012 Specifications of “work” or “professional” footwear. No specific toe cap resistance.

UNI 11583:2015 Footwear marked UNI 11583:2015 meets the requirements of the UNI 11583:2015 standard which specifies the requirements for safety, protective and work footwear for professional use for work on sloping roofs.

FOOTWEAR CLASSIFIED “S”		
SB	BASIC Requirements	
S1/01	S1/01 BASIC requirements supplemented by:	<ul style="list-style-type: none"> ■ closed back (also low footwear) ■ antistatic ■ FO resistance to hydrocarbons ■ energy absorption capacity of the heel
S2/02	S1/01 BASIC requirements supplemented by:	<ul style="list-style-type: none"> ■ dynamic waterproofing of the upper material
S3/03	S2/02 BASIC requirements supplemented by:	<ul style="list-style-type: none"> ■ anti-puncture plate ■ sole with lugs or tread
S4/04	S3/03 BASIC requirements supplemented by:	<ul style="list-style-type: none"> ■ antistatic ■ energy absorption of the heel ■ FO resistance to hydrocarbons
S5	S4 BASIC requirements supplemented by:	<ul style="list-style-type: none"> ■ anti-puncture plate ■ sole with lugs or tread

SLIP RESISTANCE CLASSES	
SRA	Slip resistance with ceramic ground with water and detergent.
SRB	Slip resistance with steel and glycerine ground.
SRC	Slip resistance with both conditions described above.

All Sparco Teamwork safety footwear is certified with SRC class slip resistance.

Marking of conformity with Regulation (EU) 2016/425	Manufacturer's name SPARCO			Production date 01/022

V = Mandatory requirement for the indicated category
0 = Optional requirement added to the mandatory ones, if indicated on the marking - = Non-mandatory requirement, check shoe stamping

ESD CEI EN 61340-5-1 2016 | COR 1:2017 STANDARD

The abbreviation **ESD** (ElectroStaticDischarge) indicates a **discharge of static energy that passes from one body to another**. In hazardous workplaces, ESD discharges can be the cause of even serious accidents (starting a fire), and can damage machinery and their sensitive components.

ESD shoes are required for:

- Work with microchips ■ Production of sensitive electrical parts ■ In painting
- When working in contact with flammable liquids and gases

Evaluated on ESD by conditioning the shoe at 12% relative humidity:

- resistance of the footwear/operator combination | metal electrode less than $1x10^{-9}\text{ ohm}$
- storage capacity of the electric charge of the footwear/operator combination | metal electrode less than 100 volts

REGULATION (EU) 2016/425

Article 47: EC certificates issued in accordance with Directive 89/686/EEC are valid until 21/04/2023.

After 21/04/2019, all new models must be certified according to Regulation 2016/425.

COMPLIANCE WITH THE REACH REGULATION

The company complies with the REACH Regulation (EC) no. 1907/2006 in force since 1 June 2007, ensuring that the products used and supplied by SPARCO TEAMWORK:

- do not contain SVHC (Substance of Very High Concern) substances;
- do not contain substances that are on the list in Annex XIV_ of the REACH Regulation;
- do not contain substances that are on the constantly updated Candidate List;
- do not contain substances subject to restrictions (Annex XVII of REACH) that the relative restrictions of use are observed.

Furthermore, in the event that an article contains an SVHC (Substance of Very High Concern) substance or one on the Candidate List in concentrations higher than 0.1% weight/weight, sufficient information is provided with the name of the substance and instructions helpful for the safe use of the article (see Article 59.1 of REACH).

NEW EN ISO 20345:2022

Footwear for professional use in accordance with EN ISO 20345:2022 are marked with an “S” (Safety) as Safety Footwear.

Safety footwear categories:

Category	Class	Additional requirements
SB	I o II	Safety basic requirements
S1	I	SB + Closed heel area + Antistatic property + Energy absorption of seat region
S2	I	S1+ Upper water penetration and absorption
S3 (metal insert type P) or S3L (non-metal insert type PL) or S3S (non-metal insert type PS)	I	S2 + perforation resistance according to the type cleated outsole
S4	II	SB + Closed heel area + Antistatic property + Energy absorption of seat region
S5 (metal insert type P) or S5L (non-metal insert type PL) or S5S (non-metal insert type PS)	II	S4 + perforation resistance according to the type cleated outsole
S6	I	S2 + water resistance of the whole footwear
S7 (metal insert type P) or S7L (non-metal insert type PL) or S7S (non-metal insert type PS)	I	S3 + water resistance of the whole footwear
Class I: Footwear made from leather and other materials, excluding all-rubber or all-polymeric footwear		
Class II: All-polymeric (i.e. entirely moulded) including all-rubber (i.e. entirely vulcanized) footwear		

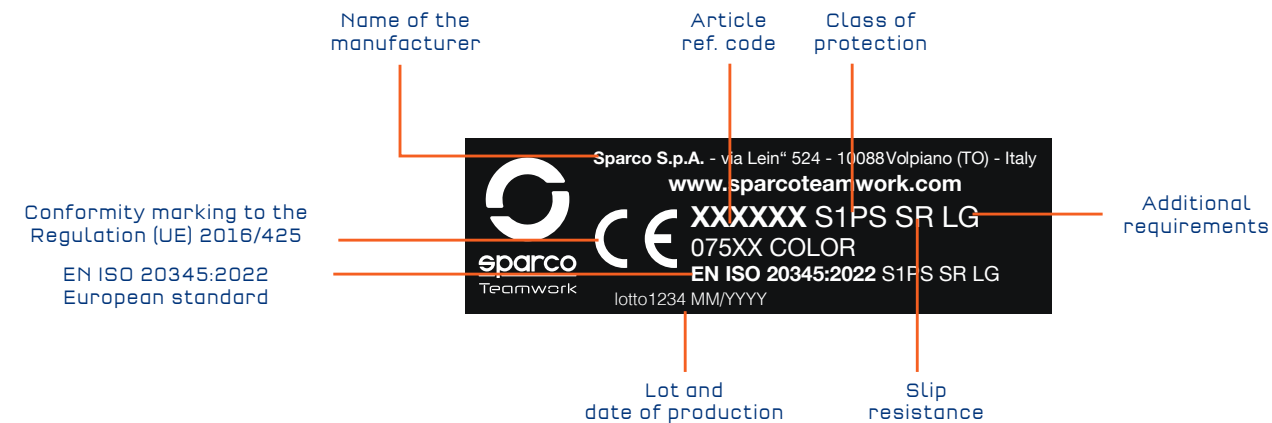

Sparco Teamwork footwear are designed to minimise the risk of injury which could be inflicted by the wearer during use. They are designed to be used in conjunction with a safe working environment, and will not completely prevent injury if an accident occurs which exceeds the testing limits of EN ISO 20345:2022.

The footwear protects the wearer's toes against risk of injury from falling objects and crushing when worn in industrial and commercial environments where potential hazards occur with the following protection plus, where applicable, additional protection.

Impact protection provided is 200 Joules.
Compression protection provided is 15,000 Newton's.

PRODUCT MARKING

Marking on footwear denotes that the footwear is licensed according to the PPE regulation and is as follows:

Additional protection may be provided, and is identified on the product by it marking as follows:

	Marking code
Perforation resistance	
Perforation resistance (min.1100 N) metal insert : d=4.5mm Conical Nail	P
Perforation resistance (min.1100 N) non-metal insert :d=4.5mm Conical Nail	PL
Perforation resistance (min.1100 N & each single value ≥950 N) non-metal insert: d=3.0mm Conical Nail	PS
Electrical properties	
Partially Conductive (maximum resistance 100 kΩ)	C
Antistatic (resistance range of 100 kΩ to 1000 MΩ)	A
Resistance to inimical environments:	
Heat Insulation of sole complex	HI
Cold Insulation of sole complex	CI
Energy absorption of seat region (20 Joules)	E
Water resistance	WR
Metatarsal protection	M
Ankle protection	AN
Cut resistant	CR
Scuff Cap abrasion	SC
Slip resistance - on ceramic tile floor with glycerine	SR
Upper	
Water penetration and water absorption	WPA
Outsole	
Resistance to hot contact	HRO
Resistance to fuel oil	FO
Ladder grip	LG

SLIP RESISTANCE

For footwear successfully tested against EN ISO 20345:2022 slip resistance, the following marking symbol apply:

- Basic requirement of slip resistance: Ceramic tile with sodium lauryl sulphate, no symbol.
- Additional requirement of slip resistance: Ceramic tile with glycerol, symbol SR.
- The footwear is not tested against slip resistance requirement, it is marked with symbol “Ø”.

Note: Slippage may still occur in certain environments.

PERFORATION RESISTANCE

In Sparco Teamwork footwear, non-metal perforation-resistance insert is used. The perforation resistance of this footwear has been measured in the laboratory using standardized nails and forces. Nails of smaller diameter and higher static or dynamic loads will increase the risk of perforation occurring. In such circumstances, additional preventative measures should be considered. Three generic types of perforation resistant inserts are currently available in PPE footwear. These are metal types and those from non-metal materials, which shall be chosen on basis of a job-related risk assessment. All types give protection against perforation risks, but each has different additional advantages or disadvantages including the following:

Metal (e.g. S1P, S3): Is less affected by the shape of the sharp object/hazard (i.e. diameter, geometry, sharpness) but due to shoemaking techniques may not cover the entire lower area of the foot.
Non-metal (PS or PL or category e.g. S1PS, S3L): May be lighter, more flexible and provide greater coverage area, but the perforation resistance may vary more depending on the shape of the sharp object/hazard (i.e. diameter, geometry, sharpness). Two types in terms of the protection afforded are available. Type PS may offer more appropriate protection from smaller diameter objects than type PL.

CE DECLARATION OF CONFORMITY

For Declaration of conformity, please refer to website: www.sparcoteamwork.com.

TERMS OF SALE

The data and characteristics indicated in this catalogue are subject to changes without prior notice.

The photographic reproduction of the shades of colour may not be perfectly faithful to reality.

In order to constantly improve the collections, the products contained in this catalogue could be replaced or modified. The photos contained are purely illustrative and not binding.

ADRENALINE, PERFORMANCE, SAFETY AND PASSION:

the four key words that have always characterized Sparco in its technical support activity for **Motorsport teams**, first and foremost Redbull in F1. Hence the desire to support the ambitious project of '**Acrobatica**' and skipper Alberto Riva with the 'Sparco Teamwork' brand, synonymous with quality and trust in teamwork.

Sparco TEAMWORK is alongside ACROBATICA not only for the "**Class 40**" sporting activity, but also in the specific construction and restoration activity of all the staff employed daily with the **supply of personalized 'Acrobatica' safety shoes and workwear**.
